NEW!

BEE KEEP HOSE POT

SAGE - 445
14"H x 18"W

Roomy enough to conceal 150 feet of garden hose, these handsome hose pots enrich the yard and garden with their style and charm. Each pot is handmade using old-world techniques with modern innovation to create an attractive and practical outdoor accent. A raised interior base helps guide the hose within the container, while multiple drainage holes eliminate excess water. An ample side hole allows the hose to be easily connected to an outdoor faucet. These lovely containers are versatile, and can be used as graceful planters or impressive drink buckets sure to strike up conversation. Offer your customers a variety of styles in either polished copper, antiqued brass, or beautiful sage colored steel.
