

# RAIN CHAINS

Originating hundreds of years ago in Japan, Rain Chains act as linked funnels that are a decorative alternative to a cheerless gutter downspout. Rainwater playfully dances and flows down these hand-crafted copper channels producing a pleasing sound as it is guided from the rooftop to the ground. All copper Rain Chains are now available with an antiqued finish for that classic weathered look.

The Watering Can and Teapot leaders can be used interchangeably with other Rain Chains to create a unique design.

## RAIN CHAINS

Originating hundreds of years ago in Japan, Rain Chains act as linked funnels that are a decorative alternative to a cheerless gutter downspout. Rainwater playfully dances and flows down these hand-crafted copper channels producing a pleasing sound as it is guided from the rooftop to the ground. A natural patina will develop over time adding to the character and charm of these delightful chains and cups.
